Company profile

GMK ŁOBEZ S.A. is a joint stock company that has been created by restructuring a government owned corporation bearing the same name, which had been operating in the market since 1949.

Currently all the shares of GMK ŁOBEZ S.A. are in private hands.

At present, GMK ŁOBEZ S.A. is a service and production enterprise focused on:

- cooperation with both huge and individual companies that operate in automobile, agricultural and other industry branches.
- execution and assembly of steel and other structures in the scope of mechanical and welding works.

The basic production directions of the establishment include:

1. Production of rubber and rubber-metal products, encompassing a very wide variety of wares, ranging from very small up to large ones. This department deals with manufacture of rubber and rubber-metal products as parts of the primary equipment for Jelczańskie Zakłady Samochodowe, AUTOSAN S.A. Sanok, TES GROUP, KONSTAL S.A. GEC ALTSHOM Chorzów, GMT Bautzen, PETERS, as well as spare parts for numerous types of lorries, buses, agricultural machines, and other industry machines and devices.

Currently, the assortment of wares includes more than 300 of permanently available items as well as another 300 products that are custom-made.

2. The department for machining covers the scope of lathe and milling works, etc., and the manufacture of semi-finished products - for the purpose of the department for manufacture of rubber-metal wares - is its fundamental production area.

3. The department for plastic folding and welding, which - in recent years- has essentially been dealing with execution and assembly of steel structures for storage and production halls, shelters and canopies, as well as numerous other light, welded structures such as for example: horse stalls, entrance gates, containers, fences etc. Here it ought to be emphasised that the majority of the production is intended for export to Germany and Belgium. The department possesses huge actuation capacity in the scope of plastic folding and cutting of metals.

4. The tool-room department is chiefly focused on executing vulcanising moulds and other types of instrumentation, such as: cutting dies, stamping dies and special instruments, as well as partial overhauls and running repairs of machines and devices from other production departments. Additionally, it provides overhaul and repair services as well as instrumentation execution to external customers.

The main assortment for the automobile industry includes rubber and rubber-metal elements of all suspension system types:

- inserts for torque bars
- flexible couplings
- suspension spring pins and bushings
- silent blocks
- rolling lobe air springs
- buffers and bumpers
- spring inserts
- suspension springing elements

The company implemented the ISO 9001:2008 Quality Management System and possesses the welding certificate of the DIN 18800-7:2002-09 standard.

There are 76 employees currently employed at GMK ŁOBEZ S.A..

To sum up, one needs to say that the enterprise has the necessary production halls, machine park, technical infrastructure, as well as a qualified crew, at its disposal. There are possibilities of development in the area of further increasing the product range and changing the production profile, dependant from the needs of the market.
